

Quality Water is assured with a TruSoft Filter System

The Whole Home Water Treatment System

Quality water is a necessity for today's active family. Better quality water is not only healthier, but it will also make you more comfortable as well as save you money in the long run. A complete home water system can be designed to treat your specific water quality needs. The system may include a complete whole home media filter system, a water conditioner and a quality drinking water filtration system. Ask your water treatment professional about a water test to determine what components your home needs.

- Reverse Osmosis or Filtration System
- Whole Home Media Filter System
- Water Conditioner

Whole home media filter systems are designed to provide your home with better tasting, purer water, while also removing the undesirable substances that may be present in problem water.

When teamed-up with a water conditioner and drinking water filtration system, you can be sure that your family has the best water available for the best value. These systems not only improve your water, they improve your quality of life!

Whole home water filter systems can be designed to reduce these substances in your water:

- Iron, Rust & Sediment • Manganese • Acidic pH • Excess Chlorine Odor
- Hydrogen Sulfide – Rotten Egg Odor • Benzene • Turbidity
- Trihalomethanes (known carcinogen) • VOC's (Volatile Organic Compounds)

In the Bathroom

- No more iron-stained fixtures
- Odor-free water for your shower
- Chlorine-free water
- Your skin and hair feel nicer

In the Kitchen

- Odors & stains removed
- Better tasting, filtered drinking water at your tap
- Eliminates expense & hassles of bottled water
- Improves the taste of juice, coffee, pasta and soup

In the Laundry

- Clothes & linens are brighter
- Appliances last longer

Premium-Quality Drinking Water

Combine a water filter, water conditioner system and Reverse Osmosis (RO) system to provide your family with purer, better tasting, drinking water.
